## EDUCATION

### University of Massachusetts Amherst

Amherst, MA

*Bachelor of Science in Computer Science*

*Expected Graduation: May 2026*

- Relevant Coursework: Data Structures and Algorithms, Object Oriented Programming, C Programming, Computer Systems Principles/Assembly, Discrete Mathematics, Linear Algebra, Web Development

## EXPERIENCE

### Software Engineer Intern

June 2023 – August 2024

*Independent Pipe and Supply Corporation*

*Canton, MA*

- Leveraged data analysis tools to create 12 custom pricing catalogs, organizing and processing information for 25,000+ items to support over \$150,000 in sales
- Reduced onboarding time by 40% using NinjaRMM scripting for software installation
- Implemented security groups within the active directory, streamlining permissions assignment for 120+ employees
- Resolved 100+ tickets, providing technical support via diagnosing and resolving hardware and software issues

### Undergraduate Research Assistant

June 2024 – August 2024

*UMASS - Manning College of Information and Computer Sciences*

*Amherst, MA*

- Collaborated with two undergraduate students under the mentorship of computer network security PhD to research privacy-focused subset of machine learning
- Leveraged web scraping tool to extract and process 60,000 data points, visualizing results using Matplotlib
- Presented research findings on security vulnerabilities in machine learning with a focus on privacy-sensitive techniques through a poster presentation to an audience of 400+ people

## PROJECTS

### HireMap - Job application Tracker | *JavaScript, SQLite, Express, Node.js* September 2024 – December 2024

- Collaborated with a team of 7 to develop a web application enabling users to track job applications efficiently.
- Developed data models for backend storage and routes for securely managing and downloading resumes linked to job applications
- Designed and implemented the Profile Page, allowing user data input, resume and cover letter uploads, and profile customization using JavaScript, HTML, and CSS

### SpeakHire - Voice-based AI Interviewer | *React.js, Flask, OpenAI Api*

November 2024

- Collaborated on a voice-interactive AI interviewer that evaluates candidate responses based on company criteria
- Integrated real-time voice recognition using react-speech-recognition to capture user speech for feedback
- Developed Flask-based APIs to process candidate responses and leverage OpenAI's API for detailed performance evaluation

### Kiyani Ticketing - IT ticketing application | *React, MongoDB, Tailwind CSS*

June 2024 – October 2024

- React-based ticketing web application, implementing user login, ticket creation, deletion and management
- Developed and implemented user and admin login functionality to ensure role-based access control and maintain segregation of duties
- Utilized MongoDB Atlas for cloud-based data storage, ensuring scalable and flexible management of user data and ticket information

## SKILLS AND ACTIVITIES

**Languages:** Python, JavaScript, HTML, CSS, C, Java

**Frameworks and Tools:** React, Next.js, Node.js, Github, Git, SQL, SQLite, MongoDB, Firebase Authentication, VS Code, XCode, Postman

**Activities:** Google Developer Student Club (Events coordinator & outreach lead), UMASS Men's Rowing, CICSOFT (coding club)

**Certifications:** Schneider Global Student Experience (Sales & Marketing, Summer 2024), Mozilla JavaScript Fundamentals (July 2024)
